Engine immobilizer system

The vehicle's keys have built-in transponder chips that prevent the engine from starting, if the key has not been previously registered in the vehicle's on-board computer.
Never leave the keys inside the vehicle when you leave the vehicle.

The indicator light flashes to indicate that the system is operating, after the engine switch has been turned to the LOCK position.

■ System maintenance

The vehicle has a maintenance-free type of engine immobilizer system.

■ Conditions that may cause the system to malfunction

● If the grip portion of the key is in contact with a metallic object.

● If the key is in close proximity to or touching a key to the security system (key with a built-in transponder chip) of another vehicle.

■ Certifications for the engine immobilizer system (for vehicles sold in U.S.A.)

FCC ID: MOZRI-4ATY(a)

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Certifications for the engine immobilizer system (for vehicles sold in Canada)

Operation is subject to the following two conditions:

(1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

 NOTICE

For proper system operation

Do not modify, remove of disable the engine immobilizer system. If any unauthorized changes or modifications are made, proper operation of the system cannot be guaranteed.

Alarm

The system sounds the alarm and flashes lights when forcible entry is detected.

Triggering the alarm

The alarm is triggered in the following situations.

- A locked door or trunk is unlocked or opened in any way other than using wireless remote door lock function or using the key. (The doors will lock again automatically)
- The hood is opened while the vehicle is locked.

Setting the alarm system

Shut the retractable hardtop if it is opened. After exiting the vehicle, close the doors, trunk and hood, and lock both side doors. The system will be set automatically after 30 seconds.

The indicator light changes from being on to flashing when the system is set.

Deactivating or stopping the alarm

Do one of the following to deactivate or stop the alarm.

- Unlock the doors or trunk.
- Start the engine. (The alarm will be deactivated or stopped after a few seconds.)

Items to check before locking the vehicle

To prevent unexpected triggering of the alarm and vehicle theft, make sure of the following.

- Nobody is in the vehicle.
- The windows and retractable hardtop are closed before the alarm is set.
- No valuables or other personal items are left in the vehicle.

Triggering of the alarm

The alarm may be triggered in the following situations.
(Stopping the alarm deactivates the alarm system.)

- A person inside the vehicle opens a door, the trunk or hood.
- The battery is recharged or replaced when the vehicle is locked.

Panic mode

When "PANIC" button is pushed for longer than about one second, the headlights/tail lights/emergency flashers will flash, the interior lights will come on, and an alarm will sound for about 60 seconds to deter any person from trying to break into or damage your vehicle.

To stop the alarm, push any button on the wireless remote control.

Theft prevention labels (U.S.A. Only)

Your new vehicle carries theft prevention labels.

Approximately 1.85 in. (47 mm) by 0.47 in. (12 mm)

ILY16G003

These labels are attached to the vehicle to reduce vehicle theft by facilitating the tracing and recovery of parts from stolen vehicles. Do not remove under penalty of law.
